

The Solution for your Crawl Space

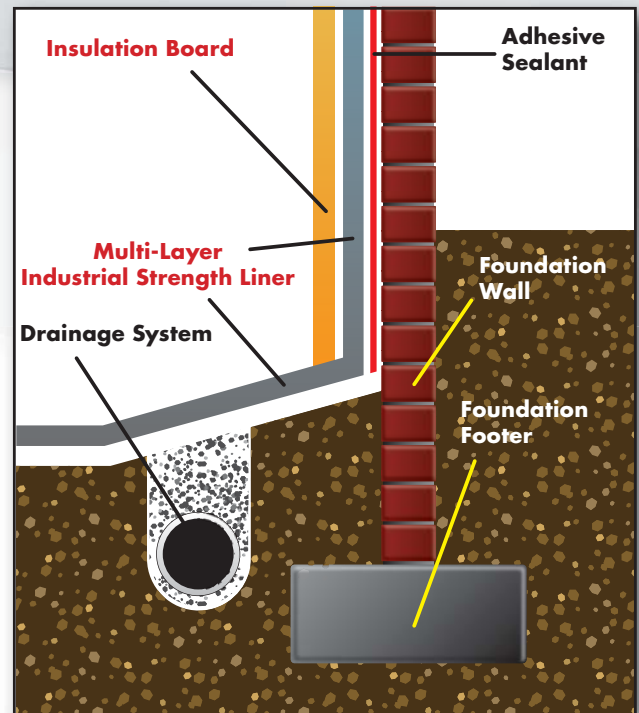

Conditioned Crawl System

Our Conditioned Crawl System insulates your crawl space. This reduces the flow of cold air under your house using the best insulation available.

- **25 Year Warranty**
- **Multi-Layer Polyolefin Liner** specifically engineered to be more resistant to vapor intrusion, completely sealing off crawl vents
- **Interior French Drain System**
 - Industrial grade 4' slotted/corrugated pipe
 - Silt screen Sock around pipe
 - Placed in a bed of aggregate
 - Drainage system installation does not disturb termite treatment area
- **High-Quality Insulation Board** installed against entire crawl space wall
- **Designed to prevent moisture, mold and mildew damage** in crawl space
- **System designed to allow homeowner to completely condition crawlspace** using existing HVAC System
- **Existing floor insulation removed**

Preparatory Options

- **Intervention** - 24 hours in advance, we perform environmentally friendly treatment in the crawl space to kill any airborne spores
- **Stabilize** - We also place industrial strength dehumidifiers in the crawl space to stabilize the humidity level
- **Grading** - Some crawl spaces require grading for proper drainage
